

GLP/GCP-Compliant Veterinary Contract Research Organisation

About EpiVets

EpiVets is a GLP/GCP-compliant Contract Research Organisation (CRO) specialising in veterinary product trials across New Zealand and Australia. We combine epidemiology-led study design, independent Animal Ethics Committees in both countries, and deep regulatory expertise to deliver farm-scale, scientifically robust trials that produce registration-ready data trusted globally.

Our Core Capabilities

Trial Design & Protocol Development: Epidemiology-driven designs ensuring statistical power and defensible results.

Trial Operations (GLP/GCP): Multi-site trials on farms, clinics, and facilities under GLP Mark of Competence (IANZ & NATA).

Independent Ethics Approvals — Tika Ethics: In-house Animal Ethics Committees in New Zealand & Australia for faster, compliant approvals.

Data Management & Analytics: Clean, auditable datasets and advanced analytics for registration-ready outputs.

Regulatory Submission Support: Expertise across MPI, ACVM, and APVMA frameworks for smooth dual-market approvals.

Why Sponsors Choose EpiVets

- GLP/GCP-compliant CRO with independent mark of competence
- Independent Animal Ethics Committees in NZ & AU (Tika Ethics) for faster approvals
- Epidemiology-led trial design for robust, defensible results
- National farm and clinic networks for large-scale trials
- Trans-Tasman coverage — New Zealand & Australia
- End-to-end service from design through to registration
